

SG-180[™]

Turf Product

SG-180 contains soil enzyme biostimulants with a history of helping turf achieve new heights in root production. SG-180 will help you increase the nutrient density in your turf while restoring health and color. SG-180 used with your standard fertilizer program is a combination that will deliver under even the harshest conditions.

SG-180 Benefits

- Increases root mass
- Improves stress tolerance
- Increased biological activity
- Greater efficiency
- Improved disease tolerance
- Environmentally friendly
- Enzyme activators
- Feeds both soil and plant
- Increased nutrient absorption
- Conditions compacted soil
- Better appearance and color

SG-180 Results

SG-180 increased the roots from 1.5 inches to over 4 inches on *Poa annua* greens, 2010.

"The dramatic increase in plant health and root density has allowed me the flexibility to perform the cultural practices necessary to maintain optimum putting surfaces." Superintendent (Bonita Golf Club)
