

SG Assist[™]

On-Seed Starter Additive

SG Assist is a powerful and efficient combination of naturally occurring microorganisms, carbon compounds and bio-stimulant components that are designed to establish and sustain soil microbiology and maximize corn ear size. Increased soil microbial activity and nutrient availability during early plant growth results in better root establishment and increased yield potential. SG Assist is ideal for use on any row crop including corn, soybeans, and wheat.

Plant Date: 4/18/16 Seed Variety: Stone 6294 Population: 35,000/acre Harvest Date: 9/27/16

Product Details

SG Assist: Apply at 2 qt/acre with in-furrow liquid starter fertilizer. For use on any row crop including corn, soybeans, and wheat.

SG Assist is compatible with most liquid fertilizers.
Always perform a jar test prior to tank mixing.

The combination of 7-25-5 and SG Assist increases nutrient availability and uptake for maximum production potential. 2016 trial results (shown above) demonstrate the power of this starter combination. SummitGold starter products ensure your fertility inputs are more efficient and your operation more profitable.
