

Foliar Spray

Give your crop the extra energy it needs to achieve top yield with Shift foliar spray. Combining a complex of potassium, manganese, zinc, carbon compounds, amino acids and sugars, Shift delivers a powerful boost to the plant's photosynthetic processes which increases plant energy, maximizes plant growth and overall health.

No need for extra trips through the field. Apply Shift with herbicide or pesticide sprays throughout the season.

Product Details

Apply a minimum of 1 gal / acre for growing season

- * Apply 1 gal / acre rate in a single spray
- * If making multiple spray applications in a season, apply 1/2 gal per acre with each application.

Shift is compatible with most liquid fertilizers and pesticides. Always perform a jar test prior to tank mixing.

Shift foliar spray increased soybean yields by 10.5 bushels in the 2016 trial (shown above). With a 25% increase over the control, the power of extra energy delivered directly to the growing plant can be clearly seen. Shift foliar spray is a simple and cost-effective way to increase the yield and profitability of your crop.
