

Strawberry Program Trials

Holden Research and Consulting

The **SummitGold** strawberry program has been independently evaluated for three years in the Ventura/Oxnard California area with *Holden Research and Consulting*. Each year our products have consistently delivered outstanding returns to the grower.

Yield Results: 2011-2014

Year	Production Increase	Net Return
2011	593 trays/acre	\$1405/acre
2012	605 trays/acre	\$2400/acre
2014	394 trays/acre	\$1600/acre

How does this product work?

This kind of yield increase is possible because of a balanced blend of *micronutrients, sugars, amino acids, live organisms, and growth regulating substances*.

How is the product applied?

The liquid product is easily applied through drip tape irrigation at two week intervals starting 2-4 weeks after transplant.
